Task 2: Nordstrom Login Page

Feature: Nordstrom.com Login Page

User Story: "As a Nordstrom customer, I want to log in to my account by entering my email and password and clicking a button, so that I can access my shopping history and saved items. If my email or password is wrong, the system should not log me in and should display a message on the screen (e.g., 'Please check your email and password and try again')."

Acceptance Criteria:

1. The email address field and the password field are visible on the login page.
2. A "Login" button is visible and clearly labeled.
3. The password field should mask the input characters with dots or asterisks while the user is typing.
4. The "Login" button is enabled only when a valid email address is entered in the email field and the password field is not empty.
5. The system should not log in the user if the entered email address or password is not valid.
6. An error message, such as "Please check your email and password and try again," should be displayed on the screen when the login fails due to incorrect credentials.
7. A "Forgot Password?" link is present and redirects the user to the password recovery page.
8. The email field should validate the format of the email address (e.g., must contain a "@" symbol and a domain).
9. The password field should not have a character limit.
10. The system should be responsive and display correctly on both desktop and mobile devices.
